

On the Subject of Alphabetize

You know the alphabet, right? Well, get ready to learn it again!

The module displays a chalkboard with a letter. Determine if this letter is or is not in the alphabetic sequence by going through the list of rules below and using the median of the results based on the true rules. If there is no median, the correct Alphabetic string is the modern English Alphabet.

Select the right side of the module if the letter is next in the sequence. Select the left side of the module if it is not next in the sequence.
